

## Wellness Upgrade

# Fill Your Body and Mind with Healing Vibration

Upgrade your sauna with our exclusive Vibration Resonance Therapy (VRT). Combining sound and vibration together, VRT effortlessly brings you to a deep sense of relaxation. Our vibrational sound pods attach easily to turn the bench into a live speaker, while giving you the feeling of a light massage that flows with the music. Songs are introduced from your smartphone or other devices and connect to the built-in Bluetooth or AUX plug-in.

### Relaxation from the Bottom up

Attached below the sauna bench, our exclusive VRT amplifies the sound and creates gentle vibratory waves. These waves resonate throughout the entire body activating the "Relaxation Response" to reduce stress and bring inner peace. Regular VRT use can even help relieve many chronic illnesses through long term stress reduction.

### Harmony from the Top Down

Our infrared sauna benches and backrests are ergonomically designed to work in tandem with VRT to create a profound state of calmness. Relax with your favorite music to dramatically increase the effect of your sauna session. You will feel revitalized and focused and able to get back to your day in a brand new way. Many customers report feelings of increased inner harmony and mental clarity.

### Breathe Easier and Feel Better

VRT use has the ability to deepen respiration. When we breathe easier and deeper we feel better. Breathing also has the power to change our state of mind and we have designed our special VRT system accordingly to bring added relief and a greater sense of well-being. VRT introduces calm and rhythmic vibrations to the body enhancing your infrared sauna experience for better rest and relaxation.
